

# Generative AI in Speech and Language Therapy: The Possibilities and the Pitfalls

Presentation for CIT CEN – 9<sup>th</sup> Oct 2025

I'm really looking forward to presenting at the next CIT CEN event. To get the most out of the presentation there is some preparation to do – thank you!

1. **Please watch this short video** (18 mins)- it gives a brilliant and accessible overview of generative AI. There is a lot to pack into the workshop so it's really helpful if everyone arrives with this background knowledge:

Henrik Kniberg - Generative AI in a Nutshell - how to survive and thrive in the age of AI <https://www.youtube.com/watch?v=2IK3DFHRFfw>

2. **Please also read the short article** by Matthew Wemyss, a teacher who is dyslexic and reflects on the impact generative AI has had for him.
3. We will be using [www.slido.com](http://www.slido.com) during the workshop which you can access on a **smartphone**.

I will also provide a PDF of the slides and references nearer the time.

Best wishes,

Rachel Barton
